PRECAUTIONARY BOIL WATER NOTICE FOR BLACKWELL LANE LIFTED

Effective immediately, the precautionary boil water notice issued for ECUA customers residing on Blackwell Lane has been lifted.

9/01/10

PRECAUTIONARY BOIL WATER NOTICE FOR BLACKWELL LANE

Effective immediately, a precautionary boil water notice has been issued for ECUA customers residing on Blackwell Lane.

This notice is being issued following a water main break. Residents are advised to boil water for one minute at a rolling boil or to use 6 drops of regular unscented household bleach per gallon of water for water to be used for drinking or cooking purposes. Bacteriological sampling is underway and the advisory will be lifted as soon as possible.

ECUA crews have repaired the main, and are flushing out the lines. Residents are advised that there is a possibility of discolored water as a result of the break and flushing, and to flush their home's plumbing by running their taps for a few minutes. If problems persist, customers are asked to contact ECUA Customer Service at 850-476-0480 for assistance, or see precautionary boil water notice guidelines on the ECUA website at www.ecua.org.
